I'm a creative full-stack developer, leaning more to modern front-end development.

When not coding I'm either on the golf course, in my garden or playing some games.

Experience

Azumuta / Application developer

Bringing industry 4.0 to the manufacturing companies
Apr. 2021 - May 2025

Maintaining and creating new features for a SaaS startup/scaleup using a full javascript/node stack including a (react) native app.

Some example features: In app dashboarding, custom integrations with customer ERP systems, public facing REST API, unit/integration tests, ...

- React (+ native), typescript, node, mongodb, Meteor

3D Aim Trainer / Front-end developer

Online training platform for gamers.
Jan. 2020 - Jan. 2021

Transformed the POC website to a mature platform with over 700,000 monthly users. Implemented a component-based design system to keep UI consistency high.

- Next.js, react, typescript, styled-components, Laravel

Sigura / Full-stack developer

CRM for brokers
Oct. 2018 - Jan. 2020

Helped maintain legacy jQuery/php codebase. Extended it with new features and updated parts to React when necessary.

- php, react, webpack, jquery, css

Education

Interactive Multimedia Design / Bachelor

2014-2017
